

Company Introduction

E2E Networks Ltd. <https://www.e2enetworks.com/>

E2E Networks Ltd is India's largest NSE listed cloud provider today. Founded in 2009, We were the first to bring contract-less cloud computing to the Indian startups and SMEs and soon became a platform of choice for Cloud Infrastructure used by Indian entrepreneurs. E2E Networks Cloud was used by many well known brands like Zomato, CarDekho, Milkbasket, Clovia, 1mg, Jabong during a significant part of their journey from startup stage to multi-million DAUs (Daily Active Users). We have served more than 10,000 customers and today we are confidently marching ahead on our growth journey.

Designation:Business Analyst

Experience: 4 to 6 years

Job Description:

Do you relish working in a fast paced work environment where you continue to get, often contradictory requirements from multiple stakeholders? Can you build a user story from only a few sketches? Can you translate the language of sales, support and product managers to the language of a developer? Can you feel the pain of a user who is doomed to use a UI flow that is not intuitive? We are looking for you to join our team which is one of the most solid from-the-ground-up Cloud Systems Engineering teams at India's homegrown IAAS Cloud platform. Over the last 10 years, we have built one of the fastest-growing Cloud Platforms using Open Source technologies like OpenNebula, Minio, Zabbix, DRBD, Open vSwitch, HAProxy, Kubernetes, BIND, ELK, PCS clustering, and Python/Django/Celery.

We are looking for a Business Analyst who will be the single point of contact for all development work in multiple projects and with the highest focus on bringing in new features and improvements in our cloud platform.

Responsibilities:

- Expertise in requirement analysis and gathering technical requirements
- Act as coordinator between Stakeholders, Project Manager and developer and testers for requirement clarification

- Act as a customer advocate and push for right and scalable solutions rather than easy solutions.
- Prepare wireframe for the applications & interact with the technical team to ensure that the requirements are clear and delivery of the same is time-bound
- Create and maintain user stories, UI mock-ups
- Requirement walk-through with the stakeholders, development team, and QA team
- Conduct demos and get live feedback for the continuous improvement cycle.
- Designing, reviewing and executing end-to-end test plans for any project/task
- Conduct user acceptance testing and use defect logging mechanism and follow up with the development team to resolve any outstanding defects
- Conduct retrospection and document lesson learnt
- Maintain projects internal and external documentation to the desired level of details
- Generate ideas by exploratory analysis to shape future products and provide suggestion and recommendations.
- Drive consumer research and combine it with analysis to generate actionable insights.

Skills And Qualifications:

- B.Tech in Computer/IT/Electronic and similar stream
- At least 4 years of practical experience of business analysis and requirement management.
- Good and clear verbal and written communication. Able to connect with all levels of organization.
- Strong experience in developing User stories, UI mock-ups
- Receptive of feedback and criticism and ready to produce alternative solutions.
- Details knowledge of UI/UX trends and product development cycle
- In depth knowledge of SDLC specially requirements management, Acceptance testing, bug tracking etc
- Hands on knowledge of following SCRUM methodologies. Any certification is a plus.
- Awareness of cloud service models such as IaaS, PaaS and SaaS.
- PMP or Prince certification is a plus
- To possess soft skills for conflict resolution and reaching agreements
- Ability to multitask with a keen eye on details. Ability to identify when to zoom in and when to zoom out.
